Why Choose All Natural CBD for Pain?

- 200 people per day die from drug overdoses; a study out of West Virginia claims 67% started with opioid pain killers.
- The most common illegal drugs are heroin and the 50 times more dangerous fentanyl.
- A University of Colorado study showed that opioid pain killers lengthen the period of intense pain by three weeks in lab rats.
- Actions taken to restrict opioid prescriptions will only exacerbate the problem and hasten the move to more readily available illegal drugs.
- Lidocaine in other topical pain ointments only deadens the surface pain temporarily and have a reported adverse impact on circulation and the heart.
- Hemp oil extract, Cannabidiol, also known as CBD is an all-natural pain killer that works with the body's own endocannabinoid system and is legal in all 50 states as well as most countries.
- Hemp and Marijuana are both members of the cannabis plant family, but Hemp has been bred to minimize the psychoactive THC element (<0.3%) found in Marijuana.
- CBD is non-psychoactive, non-habit forming, drug test safe.
- Cannabinoid receptors are present throughout the body:
  - CB1: In the nervous system, connective tissues, gland, and organs and can slow down the release of neurotransmitters at the molecular level, yielding therapeutic impact on pain, mood, memory, etc.
  - CB2: Primarily in the immune system and associated structures decreasing cell response and lowering inflammation and facilitating enzymatic activity.

Why Choose Premier Biomedical’s Topical Pain Relief Products

- Premier Biomedical has been in the topical pain product business since August, 2016.
- Premier Biomedical uses hemp from just one farm in Colorado without any use of pesticides.
- All CBD is extracted using only CO2, while many competitors utilize butane, which leaves residue in the final product with unknown health effects.
- Premier Biomedical does not handle any THC products, while most competitors handle both CBD and THC products.
- Proprietary formulation that ensures optimum performance of our products.
- Premier’s products have more of the active ingredient CBD than competition:
  - 96-hour pain patch with 50mg CBD vs competition at 40mg
  - 10ml Oil-Based Roll-On at 200mg CBD vs competition at 100mg or less
  - 30ml Oil-Based Spray at 500mg CBD vs competition at 100mg or less.
  - 30ml Oil-Based Ointment at 500mg CBD vs competition at 100mg or less.
- Premier Biomedical has significant intellectual property applicable to the military in the areas of anti-cancer drugs, anti-PTSD procedures, anti-aging, and extra-corporeal disease treatment.
- Premier has a working relationship with the University of Texas at El Paso and access to the technical expertise of the entire University of Texas.
- Premier Biomedical has worked with the DOD via a Cooperative Research and Development Agreement (CRADA) with the William Beaumont Army Medical Center at Fort Bliss.
Ingredients:

**96-Hour Pain Relief Patch:**
- Hemp Extracts
- Coconut oil
- Soy Lecithin
- Aloe Vera Polysaccharides
- Linoleic and Oleic acid
- Red Palm Oil
- Sweet Almond oil
- Shea butter
- Sunflower oil extract
- Persea gratissima oil
- Eucalyptus oil
- Sage and citrus essential oils

**Roll-on:**
- Hemp Extracts
- Coconut oil
- Sweet Almond oil
- Shea butter
- Persea gratissima oil
- Sunflower Lecithin
- Oleic acid
- Sage Essential Oils

**Spray:**
- Hemp Extracts
- Fractionated Coconut oil
- Sweet Almond oil
- Persea gratissima oil
- Sunflower Lecithin
- Oleic acid
- Sage Essential Oils

**Ointment:**
- Hemp Extracts
- Organic Castor Oil
- Beeswax
- Vitamin E oil
- Sage Essential Oils

Testimonials:

“I have had severe polymyalgia throughout my body, but predominantly in my shoulders and arms. I have been unable to sleep through the night without pain for the past ten years. The only relief up until now has been through the use of opioids (Oxycodone/OxyContin). My husband, Bud, has severe arthritis in his fingers and has been unable to make a tight fist due to the severe arthritic pain. We got some of your roll-on, and Bud applied it to my shoulders, back and arms. Immediately after rubbing the oil in, Bud experienced relief of pain in his fingers and was able to clench his fist without pain, and I was able to sleep soundly all night without pain. A real two-fer!”

“The CBD pain patch you created has proven to be just what she needed [for her chronic jaw pain]. It helped alleviate her daily pain and reduced her intake of other pain medication, especially prescribed opioids. The patch lasted for four days and made a real difference in her life!”

I have... a bulging disc in my lower back and arthritis in my T-connectors in my spine. I have been taking some type of opioids since the 1980’s and more recently for the past 17 years I have been taking Methadone (14) 10 mg for pain and Oxycodone (4) 10 mg for breakthrough pain. After putting the patch on, my pain completely disappeared!”

I suffer from Facet’s disease, herniated and bulging discs & spinal stenosis. Pain is reported at a constant 8 to 9 on a scale of 10. I am currently using a 25 mg Fentanyl patch, with 7.5mg Hydrocodone used for breakthrough pain. I also utilize Meloxicam at a 15mg. dose each morning to help control inflammation ... [with] a pain patch I remained relatively pain free for approximately 3-1/2 days”

“This CBD roll on needs to be in every first aid kit and medicine cabinet in America. It helps calm my phantom limb pain. Opioids, Lyrica and Cymbalta could never even touch my phantom limb pain. I want to take a bath in this oil, that’s how good it works and smells.”
